## about us

**stories:** First hand spoken stories are unique. They can share personal experiences that can bring others that much closer to who you are. They can expose struggles, beauty, and overall excitement. We have all bonded over stories whether it be sitting under the stars or sitting in a coffee shop, we want you to have a space to share your stories.

**coffee:** Summit Coffee knows that it is impossible to fully recreate the feeling of sipping coffee being surrounded by solely trees and pals, but here at Summit Coffee co. we can try! Utilizing third wave pour-over coffee to give the freshest cup that is as personal as the story you share.

**outdoors:** Imagine looking at an expansive view of pine trees as the sun rises over the Sierra Nevada mountains. You are sitting on the fallen pine needles and you are surrounded by a few close friends all sharing stories. In your hand is a warm cup of coffee that is giving off an aromatic aroma of maple and mint leaves. This cup of coffee has been poured right in front of you by your mate. We love the outdoors and we hope you do too!
